

Press Release

29th August 2009

For Immediate Release

AETHER MOBILE LAUNCH BRAND NEW AFFILIATE PROGRAM

Global roaming mobile service provider aether mobile has announced the launch of their brand new bespoke affiliate program.

aether mobile realised the need for a dedicated affiliate program after receiving a high level of interest from many different industry sectors to become part of the launch and growth of the MVNO. The affiliate program offers affiliate partners commission on sales of global roaming SIM cards, as well as an ongoing commission on all top ups made by customers, for the life of the agreement.

The aether mobile affiliate program is an easy way for companies and individuals to recommend aether mobile and earn money. A unique URL is produced for each affiliate and the cookie length of all traffic has been set at 30 days, enabling customers to research the product before purchasing so as to add extra security for affiliate partners. There are a number of marketing tools available and the system has built-in lead and opportunity tracking to make the entire experience seamless and uncomplicated for the affiliate. The online portal allows affiliates to securely log into their account, and see the level of sales they have generated in any given month, and confirms the exact level of commission an affiliate can expect to receive from those sales.

For more information about the aether mobile affiliate program, visit <http://www.aether-mobile.com/affiliateprogram.php>.

æther mobile – stay connected globally.

Editor's Notes:

About æther mobile

Æther mobile (www.aether-mobile.com) is a prepaid SIM card product which provides high quality, low-cost calls from mobile phones.

The æther global roaming service is available in 206 countries and offers FREE ROAMING in 65 destinations. This means there is no charge to receive a call in these destinations.

All æther SIMS have UK telephone numbers so that anyone phoning the handset from the UK will only pay the cost to a UK mobile and call charges are much lower than mobile phone companies charge.
